Pacific Ridge Exploration Ltd.

Notes to the Condensed Interim Financial Statements

June 30, 2016

(Unaudited - in Canadian dollars)

1. Nature of operations

Pacific Ridge Exploration Ltd. (the “Company” or “Pacific Ridge”) is in the business of acquiring and exploring resource properties in Canada. Pacific Ridge is incorporated and domiciled in Canada under the *Business Corporations Act* (British Columbia). The address of its registered office is 1710 – 1177 West Hastings Street, Vancouver, British Columbia, Canada, V6E 2L3.

The Company has not yet determined whether its properties contain ore reserves that are economically recoverable. The recoverability of the amounts shown for resource properties is dependent upon the existence of economically recoverable reserves, the ability of the Company to obtain necessary capital to finance operations including contributions from future joint venture partners. The carrying value of the Company’s mineral properties does not reflect current or future value.

These interim financial statements are prepared on a going concern basis which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business. Should the Company be unable to realize its assets and discharge its liabilities in the normal course of business, the net realizable value of its assets maybe materially less than the amounts on the statements of financial position. As of June 30, 2016, the Company had a working capital of \$464,700 based on which the Company believes it could sustain its operation and maintain its minimum obligations for the next 12 months.

2. Basis of presentation

These interim financial statements have been prepared in accordance with International Accounting Standard 34 Interim Financial Reporting (“IAS 34”) under International Financial Reporting Standards (“IFRS”). The principal accounting policies applied in the preparation of these interim financial statements are set out in Note 2 of the audited financial statements for the year ended December 31, 2015 and have been applied consistently to all the periods presented, unless otherwise stated.

These interim financial statements do not include all of the information required for full annual financial statements and should be read in conjunction with the Company’s audited financial statements for the year ended December 31, 2015.

Except for available for sale investments, which are recorded at fair value, these financial statements have been prepared on a historical cost basis and are presented in Canadian dollars, the Company’s functional currency.

The interim financial statements were approved by the Board of Directors on July 20, 2016.

During the six months ended June 30, 2016, the Company sold 1,900,000 shares for \$38,681 gross proceeds, and recorded \$32,204 loss on fair value adjustment for these shares:

The fair value of options granted was estimated at the grant date based on the Black-Scholes option-pricing model, using the following assumptions for 2015 grant: 138% annual volatility, 1.07% risk-free interest rate, 5 years life and 0% dividend yield. Stock options granted in 2015 vested immediately. There were no options granted in the six months ended June 30, 2016.

7. Capital management and financial instruments

The Company's objective in managing its capital is to maintain the ability to continue as a going concern and to explore on its mineral properties for the benefits of its stakeholders. The Company's operations have been and will continue to be funded by the sale of equity to investors or disposal of its interests in mineral properties.

There were no changes in the Company's approach to capital management during the six months ended June 30, 2016.

The Company's activities expose it to a variety of risks arising from financial instruments. The Company examines the various financial instrument risks to which it is exposed and assesses the impact and likelihood of these risks.

The Company has classified cash and other receivables as loans and receivables; accounts payable are classified as other financial liabilities.

As at June 30, 2016, the recorded amounts for cash and other receivables approximate their fair values due to their short-term nature. Accordingly, the fair value of accounts payable and accrued liabilities may be lower than the amounts recorded in the financial statements.

The fair value of the Company's marketable securities are determined by reference to the closing share price on active markets at the reporting date and thus is a level 1 fair value measurement.

8. Segmented information

The Company has one business segment, the exploration of mineral properties. All of the Company's assets and operations are located in Canada.
